

## **CLFD\$ - Close Loader's FD**

To optimize program loading the Program Loader does not normally close the current Program Library. Under some conditions (e.g. for all Command Programs) it is necessary to close the Open FD for the current Program Library.

### **1. Invocation**

To close the Loader's FD for the current Program Library code:

```
CALL CLFD$
```

No parameters are required.

### **2. STOP Codes and Exception Conditions**

No STOP codes are generated by CLFD\$.

No EXIT codes are returned by CLFD\$.

### **3. Programming Notes**

CLFD\$ should normally only be used by Command Programs.

### **4. Examples**

[EXAMPLE REQUIRED]

### **5. Copy-Books**

None.

### **6. See Also**

None.
