GXDSO$ - Disable the GX Settings Option

The GXDSO$ routine is available to disable, and re-enable, the GX toolbar.

1. Invocation

To enable, or re-enable, the GX Setting Option code:

CALL GXDSO$ USING *flag*

where *flag* is a PIC 9(4) COMP variable, or literal, with one of the following values:

0	Enable GX Settings Option
1	Disable GX Settings Option

2. STOP Codes and Exception Conditions

The following STOP codes may be generated by GXDSO$:

STOP code	Description
23952	GXDSO$ is not running on GX.

The following EXIT codes may be returned by GXDSO$:

EXIT code	$$COND	Description
23953	53	GX reported an unexpected error.

3. Programming Notes

GXDSO$ is only available with GSM SP-10, or later. GXDSO$ is only available when running on GX. Any attempt to use GXDSO$ on a non-GX terminal will result in a STOP code.

GXDSO$ may be required for applications installed at customers who "fiddle" with the GX Settings options (e.g. modifying the Label font, Data font etc. settings).

4. Examples

[EXAMPLE REQUIRED]

5. Copy-Books

None.
