GXGSS$ - Return Screen Size Information from the GX PC

The GXGSS$ routine is available to return a Screen Size string from the PC running GX.

1.   Invocation

The GXGSS$ routine is called as follows:

```
CALL GXGSS$ USING buffer
```

where *buffer* is a PIC X(1024) buffer into which the Screen Size information is returned. The returned string is zero-terminated.

2.   STOP Codes and Exception Conditions

The following STOP codes may be generated by GXGSS$:

STOP code	Description
14203	GXGSS$ has been called by an application that is not running on GX.

The following exception conditions may be returned by GXGSS$:

EXIT code	$$COND	Description
14212	12	An exception was returned by GX.

3.   Programming Notes

GXGSS$ is only available when running on GX. Any attempt to use GXGSS$ on a non-GX terminal will result in a STOP code. GXGSS$ is only available with GX V4.7r, or later. Any attempt to use GXGSS$ on an earlier version of GX will result in an exception. Furthermore, GXGSS$ is only available with GSM SP-36, or later.

4.   Examples

[EXAMPLE REQUIRED]

5.   Copy-Books

None.
