

GXGWS\$ - Return Window Size Information from the GX PC

The GXGWS\$ routine is available to return a Window Size string from the PC running GX.

1. Invocation

The GXGWS\$ routine is called as follows:

```
CALL GXGWS$ USING buffer
```

where *buffer* is a PIC X(1024) buffer into which the Window Size information is returned. The returned string is zero-terminated.

2. STOP Codes and Exception Conditions

The following STOP codes may be generated by GXGWS\$:

STOP code	Description
14203	GXGWS\$ has been called by an application that is not running on GX.

The following exception conditions may be returned by GXGWS\$:

EXIT code	\$\$COND	Description
14212	12	An exception was returned by GX.

3. Programming Notes

GXGWS\$ is only available when running on GX. Any attempt to use GXGWS\$ on a non-GX terminal will result in a STOP code. GXGWS\$ is only available with GX V4.7r, or later. Any attempt to use GXGWS\$ on an earlier version of GX will result in an exception. Furthermore, GXGWS\$ is only available with GSM SP-36, or later.

4. Examples

[EXAMPLE REQUIRED]

5. Copy-Books

None.
