

GXMWSS\$ - Minimise Window Size

The GXMWSS\$ routine is used to minimise the size of the next window by removing blanks areas to the right of, and below, the last field/button displayed.

1. Invocation

To define the next window as a Minimised Window code:

```
CALL GXMWSS$
```

No parameters are required.

2. STOP Codes and Exception Conditions

The following STOP codes may be generated by GXMWSS\$:

| STOP code | Description |
|-----------|--|
| 15221 | GXMWSS\$ has been called by an application that is not running on GX. |
| 15223 | An attempt was made to call GXMWSS\$ on an incompatible version of GX. The version of GX must be V2.6, or later. |

No exception conditions are returned by GXMWSS\$.

3. Programming Notes

GXMWSS\$ is only available when running on GX. Any attempt to use GXMWSS\$ on a non-GX terminal will result in a STOP code.

4. Examples

[EXAMPLE REQUIRED]

5. Copy-Books

None.

6. See Also
