ORW$ - Logical Inclusive OR Words

The ORW$ routine is available to perform a Logical Inclusive OR operation on single word values.

1.   Invocation

To perform a Logical Inclusive OR operation on word values code:

```
CALL ORW$ USING word1 word2 result
```

where *word1*, *word2* and *result* are PIC 9(4) COMP variables.

2.   STOP Codes and Exception Conditions

No STOP codes are generated by ORW$.

No exceptions are returned by ORW$.

3.   Programming Notes

Although the Logical Inclusive OR operation is available using the commercial code operation this routine avoids the need for commercial code.
