ULOCK$ – Release all Locks for the Current User

The ULOCK$ routine can be used to perform a "partial reset" for the current user. All file locks for the user are removed but any open files will remain open.

1. Invocation

To release all locks for the current user code:

```
CALL ULOCK$
```

No parameters are required.

2. STOP Codes and Exception Conditions

No STOP codes are generated by ULOCK$.

No EXIT codes are returned by ULOCK$.

3. Programming Notes

The ULOCK$ function should not normally be required.

4. Examples

[EXAMPLE REQUIRED]

5. Copy-Books

None.

6. See Also

None.
