

XORB\$ - Logical Exclusive OR Bytes

The XORB\$ routine is available to perform a Logical Exclusive OR operation on single byte values.

1. Invocation

To perform a Logical Exclusive OR operation on byte values code:

```
CALL XORB$ USING byte1 byte2 result
```

where *byte1*, *byte2* and *result* are PIC 9(2) COMP variables.

2. STOP Codes and Exception Conditions

No STOP codes are generated by XORB\$.

No exceptions are returned by XORB\$.

3. Programming Notes

Although the Logical Exclusive OR operation is available using the commercial code operations this routine avoids the need for commercial code.

4. Examples

[EXAMPLES REQUIRED]
