XORD$ - Logical Exclusive OR Double-Words

The XORD$ routine is available to perform a Logical Exclusive OR operation on double-word values.

1.   Invocation

To perform a Logical Exclusive OR operation on double-word values code:

```
CALL XORD$ USING dword1 dword2 result
```

where *dword1*, *dword2* and *result* are PIC 9(9) COMP variables.

2.   STOP Codes and Exception Conditions

No STOP codes are generated by XORD$.

No exceptions are returned by XORD$.

3.   Programming Notes

Although the Logical Exclusive OR operation is available using the commercial code operations this routine avoids the need for commercial code.

4.   Examples

[EXAMPLES REQUIRED]
